## ABSTRACT

As part of a study of the feasibility and effect of teaching Navajo children to read their own language first, a word count collected by 22 Navajo adults interviewing over 200 Navajo 6-year-olds was undertaken. This report discusses the word count and the interview texts in terms of (1) number of sentences, (2) number of words, (3) number of tokens, (4) type-token ratios, and (5) word-length. A frequency list gives all words used by at least 2 children. The words, mostly Navaho, are grouped in order of frequency and in alphabetical order within each frequency. A supplement lists, alphabetically, all words from the interview texts (whether used by children or adults). Frequency and range data for adults and children are given separately and in total for each word. Related documents are ED 035 484, ED 043 004, ED 043 005, ED 043 413, and ED 048 584.

NAVAJO READING STUDY

Principal Investigator: Bernard Spolsky  
Co-Director : Wayne Holm

Research assistants : Babette Holliday  
Judy Harvey  
Marlene Atcitty  
Irene Silentman

Computer Programmer : Jonathan Embry

The work reported herein was supported by the United States Department of the Interior (Bureau of Indian Affairs, Navajo Area Office, Contract No. NOO C 1420 3462), and by a grant from the Ford Foundation to the University of New Mexico.

August 1971

## Introduction

The corpus on which this word count is based was collected by over twenty adults interviewing over two hundred Navajo children. The tapes were transcribed by Babette Holliday onto IBM cards; the material was processed at the University of New Mexico Research Computing Center using programs written by Jonathan Embry. In the course of processing, the texts and word lists were edited and corrected by Marlene Atcitty, Judy Harvey, and Irene Silentman. A full description of the corpus, its limitations, and the processing is given in Navajo Reading Study Progress Report No. 9, in which orthography conventions are explained.

This report contains two word lists, one in order of frequency and the other alphabetical.

The frequency list gives all words that were used by at least two different children. The words are listed in order of frequency, and in alphabetical order within each frequency.

Because of the size of the second list, it is not included in all copies of this report, but is available as a supplement. It lists, in alphabetical order, all words in the text, whether used by children or adults, and for each word gives frequency and range data for adults and children separately and in total.

## Statistics

Number of sentences. The corpus contained 3900 adult sentences and 7230 child sentences, a total of 11,130 sentences in all.

The average sentence was 4.26 words in length, words being defined by space or punctuation. The average adult sentence was 4.48 words in length; the average child sentence was 4.15 words in length.

The average sentence was 33.0 graphemes in length, graphemes being single characters or letters. The average adult sentence was 35.3 graphemes in length; the average child sentence was 31.8 graphemes in length.

The adult sentences, then, were 8% (by words) or 11% (by graphemes) longer than the child sentences. This would seem to support the expectation that adult sentences would be longer, and probably more complex, than those of children. (It should be remembered that the adults are functioning as interviewers; they tend to be asking questions rather than giving an extended narrative.)

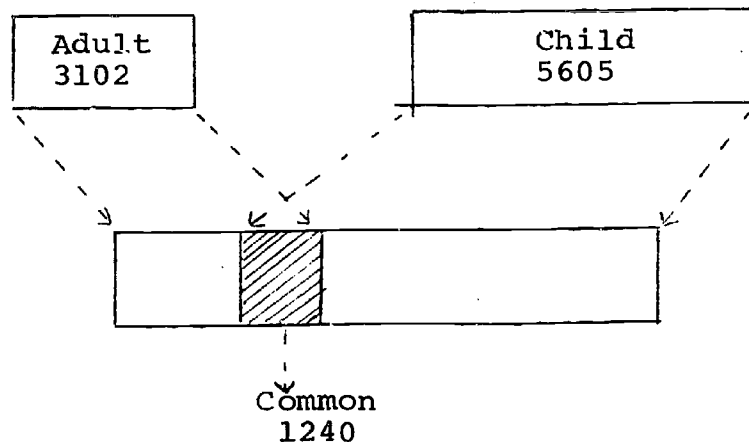

Number of Words. If one counts a word as a unique letter-sequence between spaces, then the number of words is as follows:

Adult	Child	Total
3601	6350	8657

If, however, a word is counted as a unique letter sequence between spaces or affix boundaries (i.e. after some marking of affixes has occurred, then the number of words is as follows:

Adult	Child	Total
3102	5605	7467

Two aspects of these figures are worth noting. The first is the relatively small degree of overlap between the adult and child vocabularies, less than 15%. This is obtained, using the second set of figures, by finding the difference between the total vocabulary and the combined totals of the two vocabularies--1240 words. These 1240 words are those which occur in both the adult and the child vocabulary. This common vocabulary makes up roughly 40% of the adult vocabulary but only 22% of the larger child vocabulary. Only 14% of the total vocabulary is common to both the adult and child vocabulary.

This is not what one would expect. In English, a relatively high proportion of overlap would be predicted. This might be due to the size of the corpus. But a more likely explanation has to do with the nature of Navajo. Because of the high degree of morphophonemic collapsing in Navajo, it is impossible to analyze Navajo verbs by computer at this time. While a complete paradigm for an English verb requires relatively few words, the complete paradigm of a Navajo verb probably runs to well over 200 different words. Thus, one tends to get many words with an occurrence of the same verb base. If this is the case, one must either find ways of analyzing words as being the same or make use of a much larger corpus.

The second aspect is essentially another aspect of the same problem. That is, that even when one marks affixes by hand, one does not affect a large reduction in the number of words. In reducing an 8657 word vocabulary to a 7467 word vocabulary, one has affected only a 14% reduction in apparent vocabulary size.

Number of tokens. The corpus contained a total of 47,484 running words; 17,481 of these occurred in adult speech and 30,003 in child speech. Thus, the adults, as interviewers, did more than a third of the talking (37.8%) by words.

Type-token ratios. If one defines words as unique occurrences of graphemes between spaces, then the type-token ratios would be as follows:

	<u>Type</u>	<u>Token</u>	<u>T-T Ratio</u>
Adult	3,601	17,481	1/4.9
Child	6,350	30,003	1/4.7
Overall	8,657	47,484	1/5.5

If, however, words are defined as unique occurrences of graphemes between spaces or affix boundaries, then the type-token ratios would be as follows:

	<u>Type</u>	<u>Token</u>	<u>T-T Ratio</u>
Adult	3,102	17,481	1/5.6
Child	5,605	30,003	1/5.4
Overall	7,467	47,484	1/6.4

Word-length. The average word-length for the entire sample is 7.71 graphemes. The average length of the adult word is 7.84 graphemes; that of the child word is 7.63. The mere 3% greater length of the adult word does not support very strongly the expectation that adult words would be somewhat more complex and therefore longer. One would expect this additional complexity in the verb. It may well be that the high frequency of short function words obscures a somewhat greater complexity, and length, in the adult verb forms.

## Navajo Reading Study • The University of New Mexico

1805 ROMA N.E.  
ALBUQUERQUE, NEW MEXICO 87106  
TELEPHONE 505: 277-5749

### BIBLIOGRAPHY

#### Reading Books

1. *Mósiłgai* Story by Marlene Atcitty, Illustrations by Caryl McHarney. 8 pp.
2. *Pábii dóó Mási.* Story by Judy Harvey, Illustrations by Caryl McHarney. 16pp. w/cover. (in preparation)
3. *Jasper Naané.* Story by Irene Silentman, Illustrations by Caryl McHarney. 6 pp. (in preparation)
4. *Táá' Hastóí.* Story by Judy Harvey, Illustrations by Caryl McHarney. 8 pp. w/cover. (in preparation)

#### Progress Reports

1. *NRS Progress Report No. 1.* R. Paul Murphy. July, 1969.
2. *Proposal for Language Analysis Study.* *NRS Progress Report No. 2.* August-September, 1969.
3. *Analytical Bibliography of Navajo Reading Materials.* Bernard Spolsky, Agnes Holm, Penny Murphy. *NRS Progress Report No. 3.* October-November, 1969. [ED 035 484] .\*
4. *Report of a Conference on the Language Sample, held in Albuquerque on December 4-5, 1969.* Edited by R. Paul Murphy. *NRS Progress Report No. 4.* December, 1969. [ED ] .\*
5. *Navajo Language Maintenance: Six-Year-Olds in 1969.* Bernard Spolsky. *NRS Progress Report No. 5.* March, 1970. [ED 043 004] .\*
6. *Teaching Initial Reading in Navajo: Report of a Conference of Educators held at Ka\_enta, January 30-31, 1970.* Edited by Penny Murphy. *NRS Progress Report No. 6.* April, 1970. [ED 043 005] .\*
7. *Analytical Bibliography of Navajo Reading Materials. (Revised and Enlarged Edition).* Bernard Spolsky, Agnes Holm, Penny Murphy. *NRS Progress Report No. 7.* June, 1970. [ED 043 413] .\*

8. Literacy in the Vernacular: The Case of Navajo. Bernard Spolsky and Wayne Holm. *NRS Progress Report No. 8*. March, 1971.
9. A Computer Assisted Study of the Vocabulary of Six-Year-Old Navajo Children. Bernard Spolsky, Wayne Holm and Jonathan Embry. *NRS Progress Report No. 9*. August, 1971.
10. A Spoken Word Count of Six-Year-Old Navajo Children. Bernard Spolsky, Wayne Holm and Babette Holliday, Judy Harvey Marlene Atcitty, Irene Silentman, Jonathan Embry. *NRS Progress Report No. 10*. August, 1971.
11. Navajo Spelling Lists. Wayne Holm. *NRS Progress Report No. 11*. August, 1971.
12. Grapheme and Unit Frequencies in Navajo. Wayne Holm. *NRS Progress Report No. 12*. August, 1971.
13. Navajo Language Maintenance II: Six-Year-Olds in 1970. Bernard Spolsky. *NRS Progress Report No. 13*. August, 1971.
14. Navajo Language Maintenance III: Accessibility of School and Town as a Factor in Language Shift. Bernard Spolsky. *NRS Progress Report No. 14*. August, 1971.
15. Preparing Reading Materials in Navajo. Marlene Atcitty, Judy Harvey Richard Johnsen, Caryl McHarney, Linda Rogers, Irene Silentman. *NRS Progress Report No. 15*. August, 1971.
16. English Loan Words in the Speech of Six-Year-Old Navajo Children. Agnes Holm, Wayne Holm, Bernard Spolsky. *NRS Progress Report No. 16*. August, 1971.
